WEB APPLICATION PROJECTS

Connect Four

A digital version of the classic two-player connection game:

- HTML, CSS, Javascript, jQuery
- The style and play of the original game written in JavaScript using jQuery

ASMR Trigger Happy

Share favorite ASMR videos and their triggers:

- MEN Stack App, express-session, Handlebars
- Full CRUD user and video functionality to create accounts and add content

Imbible

Discover what classic cocktails can be made with the ingredients had on hand:

- MEAN Stack App, Bootstrap, Passport
- Users submit ingredients to search the database for cocktail matches

City Tips

Users can view and post tips for their favorite cities during travel:

- Ruby on Rails, Bootstrap, Devise, PostgreSQL
- Full CRUD routes for posts by authenticated users with editable profiles

V.i.A

Allow your employees to have all their current resources right at their fingertips:

- Ruby on Rails, Materialize, Devise, PostgreSQL
- Company, store, and vendor accounts with unique levels of access to information

PROFESSIONAL EXPERIENCE

Owner/Operator, Uncle Maddio's Pizza

Atlanta, GA - 2012 to 2016

- Held position of restaurant GM during lifecycle of the business
- Worked shoulder-to-shoulder with all employees during day-to-day operations
- Handled owner responsibilities and obligations to the franchisor

Manager, Pappas Restaurants

Houston, TX & Atlanta, GA - 1989 to 2011

- Implemented new POS software system, trained employees to use it, and served as IT Manager
- Consistently scored "A" rating from Health Department and achieved top internal Quality Assurance ratings; created and managed system to self-evaluate adherence to established government and company standards
- Lowered labor cost to 13.5% (10% BOH, 3.5% FOH) without sacrificing quality
